

Zena Buzzard Guards

Data Sheet

Description

The Zena Buzzard guard prevents the birds from excreting on to the phase insulators.

Benefits

- > Transmission & Distribution operators reduce outages from flashovers and electrocutions,
- > Telecommunication operators reduce bird-related maintenance on communication towers,
- > Airport operators reduce strike risk and improve lighting and navigation equipment reliability.

Features

Designed specifically for raptors and larger birds, the Zena Buzzard Guard:

- > Discourages perching and nesting,
- > Is bird safe and environmentally friendly,
- > Installs quickly, reducing downtime,
- > Has excellent self-washing characteristics,
- > Protects 500 kV lattice structure phase insulators.

Application

The Zena Buzzard Guard mounts on to the 500 kV lattice structures in minutes, using stainless steel strapping. Molded from proprietary high-density long-life polyethylene, the Buzzard guard delivers economical and effective protection from birds and the weather.
